REPLY TO:
ATTN OF: SC-13:Roddye

SUBJECT: **DEPARTMENT OF ENERGY (DOE) ORDER O 433.1A – MAINTENANCE
MANAGEMENT PROGRAM FOR DOE NUCLEAR FACILITIES – DELEGATION
OF AUTHORITY**

TO: Dr. Raymond L. Orbach, Under Secretary for Science, SC-1, HQ/FORS

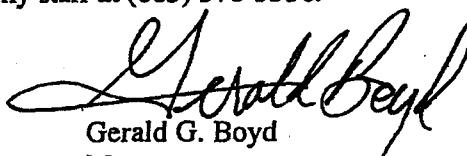

The subject Order requires that each contractor with responsibilities for nuclear facilities develop and submit to DOE for approval a Maintenance Implementation Plan (MIP). This MIP describes how the contractor implements the requirements of this Order at their specific site.

Section 5.d.(2) of the Order states that Field Office Managers are to "Review contractor MIPs every two years and forward to the appropriate approval authority (for) approval." Section 5.b.(2) states that the Secretarial Officers "Serve as approval authorities unless delegated per DOE M 411.1-1C."

The MIPs are fairly specific with reference to individual contractor implementation methods and procedures. I believe approval of such documents that rely heavily on site specific procedures and facility operations can more effectively and efficiently be reviewed and approved by the Oak Ridge staff, which is familiar with site and facility procedures, and is daily involved with operations of the nuclear facilities.

Accordingly, by this memorandum I am requesting approval of the contractor MIP be delegated to the Manager, Oak Ridge Office, for Oak Ridge National Laboratory.

If there are any questions or additional information is required, please contact me at (865) 576-4444 or Johnny Moore of my staff at (865) 576-3536.
